

• Dutch Innovative Airport Solutions (DIAS) is a collective of internationally oriented independent Dutch companies that have each developed a particular specialisation in the areas of improving passenger handling, baggage handling and airport interiors. The DIAS partners work together on various projects. • Innovation, a high level of quality and dedication to improvement of both performance and passenger experience is what unites these companies. Each with specific expertise, these companies complement each other. The cooperation ensures the optimum harmonisation of the parties involved. The final result being an excellent and cost-efficient project. • Through sharing insights and knowledge, DIAS is able to supply high-level integrated solutions for the fitting or re-fitting of airport terminals. • [www.dias.aero](http://www.dias.aero)
