

mono

Off-the-shelf counter range

mono is an new product of INTOS interior contracting and specially designed for airport, is an attractive, high quality and competitively priced counter range. The mono counter range comprises a basic counter and several add-ons. The add-ons convert the basic counter, allowing it to cater to every imaginable airport counter requirement. The add-ons can also create an airport specific look and feel.

The mono counter range is developed in close cooperation with BSQUARED. INTOS interior contracting has drawn on all of the airport knowledge and experience it has gained over the past twenty years. mono was developed in response to several requests from small and medium-sized airports for an attractive off-the-shelf counter range.

Ergonomics

European ergonomic standards were incorporated in the development of the mono design. The desktop can be mounted at different heights (700 – 1150 mm). This facilitates the creation of ergonomic counters for worldwide use. A footrest can also be integrated in the counter to increase the operator's working comfort.

About INTOS interior contracting

INTOS interior contracting is an innovative, internationally oriented company specialised in the interior fitting of buildings. Over the last 20 years, INTOS has grown to become one of the largest interior contractors in the region. For airports, INTOS develops, engineers, manufactures and installs check-in areas, counters and desks, security related products, signage and various other interior projects.

Technical specifications

Dimensions (L*W*H) : 1200*850*1150 mm
 Construction : steel frame powder-coated
 Front panel : molded Corian
 Sides and desktop : MDF with HPL finish
 Foot rail, shelf, protective strips : stainless steel

Basic counter

The basic mono counter has a molded Corian front panel, suspended from a powder-coated steel frame. The front panel can be supplied in different Corian colours. A stainless steel strip protects the front panel. The counter's sides, rear and desktop are constructed in MDF with an HPL finish.

Customizing

mono is an off-the-shelf counter range. But that does not stop it from being customized to suit the needs & requirements of the airport, as several elements are interchangeable. So there is nothing to stand in the way of giving the mono counter the customer's own look and feel.

The desktop can be supplied at different heights for seated or standing work. In addition to standard airport counter facilities (operator panels, printer cabinets, etc.), mono can be provided with -for example- various bag shelves, a foot rail or LED lighting.

'Colours'

The Corian front panel can be supplied in different colours. Also the operator's side (rear), the desktop and the cabinets can be finished in many colours.

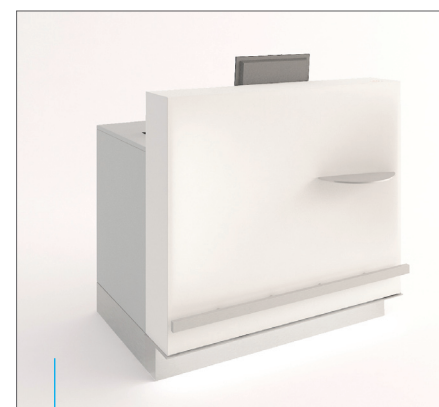

Configurations & applications

The mono counter range has tremendous versatility and can be built to answer all sorts of airport counter configurations. mono can be supplied as an individual stand-alone counter, as a double counter, as rows of counters and in various island configurations.

Versatility also applies to the mono's use. Through combining the various options, the mono can be utilised as a check-in counter, information counter, service counter (for ticketing, car rental, hotels, etc), transfer counter, passport control counter, gate counter.
